

**REMARKS**

The specification has been amended to remove "6" from paragraph [0037]. The specification simply teaches that either four wheels 4 or six wheels 4 may be attached on the right and left sides of the movable tray 2. This misnumbering has been corrected. It is submitted, therefore, that no new drawings are needed, and the objections to the drawings and specification should be withdrawn.

All claims 1-5 stand rejected under 35 U.S.C. §112, second paragraph as indefinite. Claim 1 has been amended to make it clear that the wire that is in the casing connects the receiving connector to a wire that is within the car body, but located outside of the casing. For example, wire 11, within the casting 3A is connected to receiving connector 6A and connector 6B is electrically connected to battery wires 12 (see paragraph [0040]). Further it is submitted that the language of claim 2 as easily understood by one skilled in the art. As further explanation, either the "moveable tray" or the "casing" is provided with a "guide pin" and the other (moveable tray or casing) is provided with a "pin receiver" to connect the movable tray and casing in alignment (if the movable tray includes a "guide pin", the casing has a "pin receiver"; if the movable tray includes a "pin receiver", the casing has a "guide pin").

It is submitted that all claims are of proper form and scope for allowance. Early and favorable consideration is respectfully requested.

Applicant believes no fee is due with this response. However, if a fee is due, please charge our Deposit Account No. 13-2855, under Order No. 19036/39739 from which the undersigned is authorized to draw.

Dated: April 15, 2005

Respectfully submitted,
